EXAMINER'S AMENDMENT

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: None of the prior art discloses or renders as obvious a pressure reducing valve with a cylindrical dirt trap dividing the inlet pressure chamber with a backflow means to flush accumulated dirt from the dirt trap, wherein the backflow means covers limited angular ranges and are rotatable in addition to the other elements of the structure claimed. Hecking discloses a pressure reducer with a filter which utilizes a vertical sliding member (Figure 1) to remove dirt from the filter, and lacks the backflow means covers limited angular ranges and are rotatable and the array of blind holes for the dirt to fall into. Hunter et al. disclose a flow control valve with a filter, which is caused to remove dirt by the spinning motion caused from the flow of water, but lacks the pressure reducing valve.

The information disclosure statement filed October 12, 2004 fails to comply with 37 CFR 1.98(a)(1), which requires the following: (1) a list of all patents, publications, applications, or other information submitted for consideration by the Office; (2) U.S. patents and U.S. patent application publications listed in a section separately from citations of other documents; (3) the application number of the application in which the information disclosure statement is being submitted on each page of the list; (4) a column that provides a blank space next to each document to be considered, for the examiner's initials; and (5) a heading that clearly indicates that the list is an information
